Challenge Name: String Cheese

Category: REV

Description:

This might be a bit cheesy, but see if you can find the flag inside this binary!

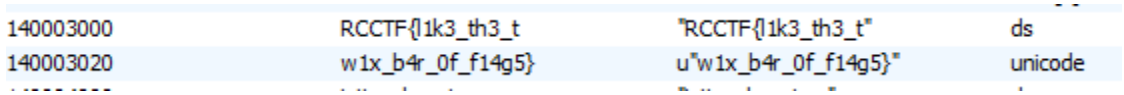
Hint(s):

If you're having trouble getting the whole flag, try being *extensive* with your search or using some dedicated tools to investigate this file.

Walkthrough:

Running strings on this file reveals a partial flag, but not quite what we're looking for.

Ghidra automatically finds the differently encoded strings, or you can use "strings -e l" on the file to look for unicode strings



Flag:

RCCTF{l1k3_th3_tw1x_b4r_0f_f14g5}
