Challenge Name: Better Times

Category: OSINT

Description:

Seeing this building can't help but remind me of better times. Its *former* glory was truly something to be marveled at. What's the closest hundredth of a degree N/S and E/W where this building is located?

Flag format: RCCTF{12.34,56.78}

Hint(s):

NONE

Walkthrough:

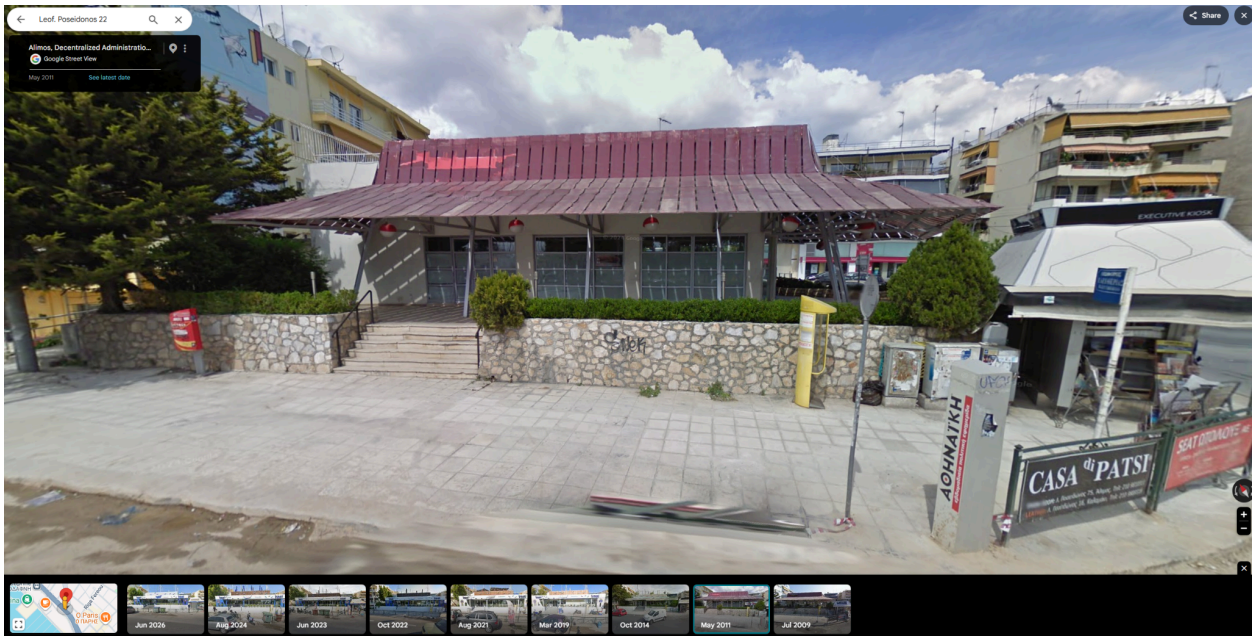

There's not too many recognizable things in this image besides what is likely the glorious building that is referred to by the challenge. Next to it, theres some kind of grey utility box that has the letters "AOHNAIKH" on it. Doing a google search for this term shows a lot of Greek results, so it seems like this photo was taken somewhere in Greece.

Based off the appearance of the building, it seems pretty likely this building used to be a pizza hut or is one in the process of being remodeled/demolished. Googling for former

pizza huts reveals a dedicated reddit community, but also a community site with locations. Using this site reveals 1 former pizza hut in greece that looks very similar.

Searching for this address on google maps and streetview going back to 2014 gives us this view that matches up with what we were given in the challenge.

The google maps location is 37.914308,23.708115, so the flag is RCCTF{37.91,23.71}

Flag:

RCCTF{37.91,23.71}
