## **Challenge Name:** Delivery

## **Category:** REV

## **Description:**

Your delivery is here! Open your package to retrieve the flag.

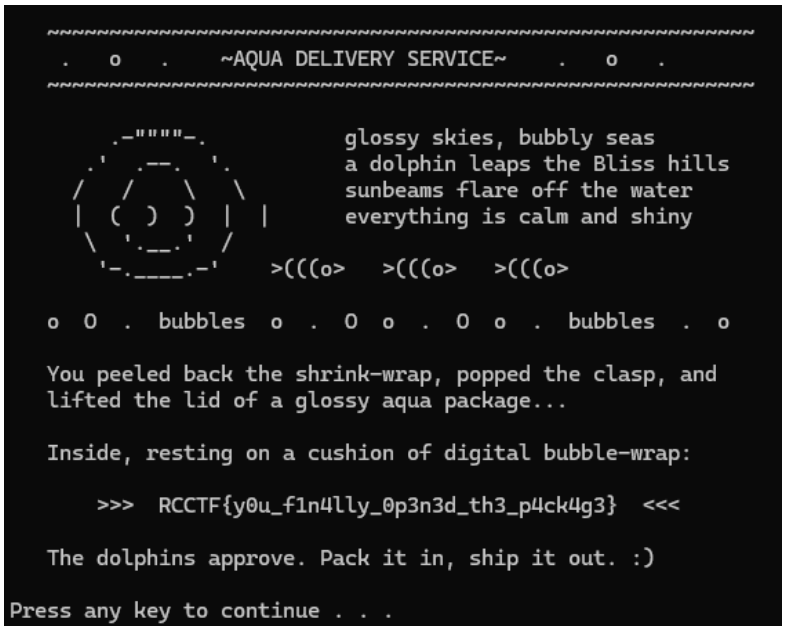
## **Hint(s):**

None

## **Walkthrough:**

There's a few ways to approach this challenge initially, but looking at strings or loading the binary into PeStudio will reveal that the string "UPX" is in the file. This is a common packer for binaries and can sometimes be unpacked using upx.

Running "upx -d Delivery.exe" will unpack the file, and running it will reveal the flag.



## **Flag:**

RCCTF{y0u_f1n4lly_0p3n3d_th3_p4ck4g3}
